

Loop 101 (Pima Freeway) HOV Lanes

Princess Drive to Loop 202 (Red Mountain Freeway)

Project Hotline (602) 235-2868

ADOT

Project Update - Sept. 2008

The expansion of HOV lanes on Loop 101 (Pima Freeway) will ease traffic for motorists who carpool when fall and winter traffic picks up. By early November, ADOT will complete the new section of HOV lanes on Loop 101, from Loop 202 (Red Mountain Freeway) to Via de Ventura. This addition to the HOV lane network will ease the flow of traffic for commuters, shoppers, students, and ASU sports enthusiasts who carpool in the East Valley.

Paving and concrete median barrier will complete the final segment of this project between Shea Boulevard and Princess Drive, adding one new HOV lane in each direction, median lighting and new rubberized asphalt to minimize traffic noise.

Project Schedule

Loop 202 to Via De Ventura
Nov. 2008 anticipate HOV lanes to open

Via De Ventura to Princess Drive
Spring 2009 anticipate HOV lanes to open

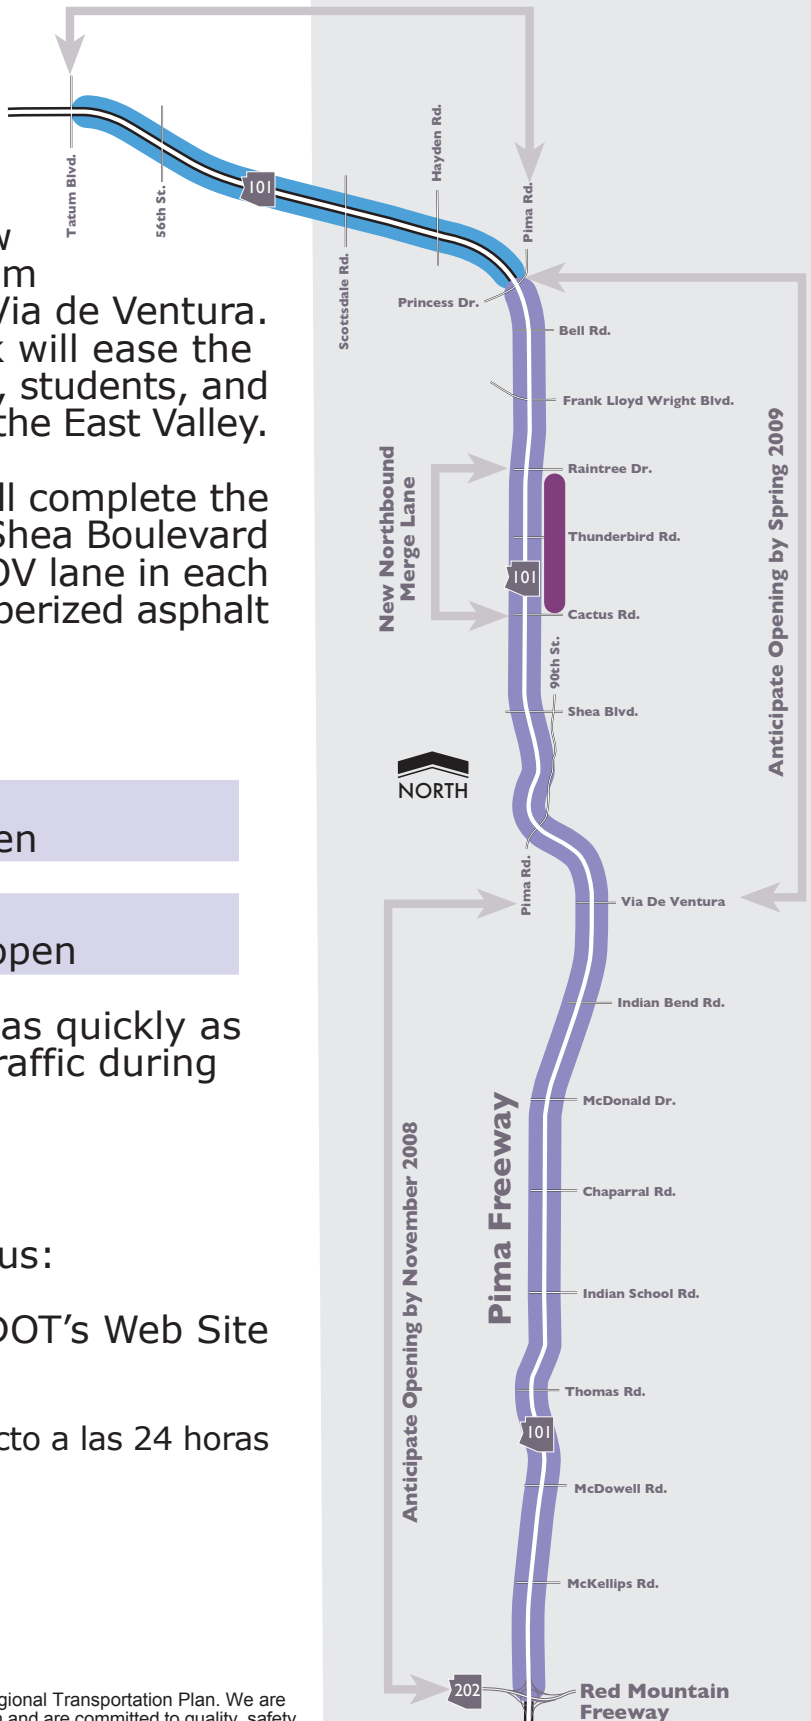

ADOT is working to finish this project as quickly as possible with minimal disruptions to traffic during this time.

Loop 101 (Pima Freeway) HOV Lanes

Princess Drive to Loop 202 (Red Mountain Freeway)

Project Information

- One new HOV lane will be added in each direction to Loop 101 from Princess Drive to Loop 202 (Red Mountain Freeway).
- Concrete barriers will separate northbound and southbound traffic on Loop 101.
- Quiet Pavement (rubberized asphalt) will be used on the new lanes to reduce noise.
- The project length is approximately 15 miles (see map inside).

New HOV lanes can be used by vehicles with two or more occupants, qualified hybrid vehicles, and motorcycles during peak travel times, between 6 and 9 a.m. and 3 and 7 p.m. Monday through Friday. HOV lanes are open to all vehicles at other times. New lanes will also accommodate expanded express bus service for the East Valley.
